Pressure Sensors

for refrigerants

QBE2001-P...**QBE2101-P...**

- Piezo-resistive measuring system
- DC 0...10 V or DC 4...20 mA output signal
- Integral cast encapsulated
- Measurement unaffected by changes in temperature
- High temperature stability
- No mechanical aging or creepage
- Internal thread 7/16-20 UNF
- Excellent EMC characteristics
- For use with all media, included ammonia

Use

The pressure sensors are suitable for the measurement of static and dynamic positive pressures in HVAC plant, particularly in hydraulic and refrigeration systems using liquid or gaseous media. In connection with accessory item FT-PZ1, they can also be employed on high-temperature steam applications.

Technical design

The pressure sensors operate on the piezo-resistive measuring principle. The sensors diaphragm (measuring element) which utilises a special grade of steel seal welded to the pressure sensor acquires the pressure through direct contact with the medium. The measurement is converted electronically into a linear output signal of DC 0...10 V or DC 4...20 mA.

Type summary

Type reference	Pressure range		Output signal
QBE2001-P10U	-1...+9 bar	-100...+900 kPa	DC 0...10 V
QBE2001-P25U	-1...+24 bar	-100...+2400 kPa	DC 0...10 V
QBE2001-P30U	-1...+29 bar	-100...+2900 kPa	DC 0...10 V
QBE2001-P60U	-1...+59 bar	-100...+5900 kPa	DC 0...10 V
QBE2101-P10U	-1...+9 bar	-100...+900 kPa	DC 4...20 mA
QBE2101-P25U	-1...+24 bar	-100...+2400 kPa	DC 4...20 mA
QBE2101-P30U	-1...+29 bar	-100...+2900 kPa	DC 4...20 mA
QBE2101-P60U	-1...+59 bar	-100...+5900 kPa	DC 4...20 mA

Ordering

When ordering, please give name and type reference, e.g.:

Pressure sensor **QBE2001-P10U**

Any accessories required must be ordered separately.

Equipment combinations

The pressure sensors can be combined with all devices or systems capable of processing the DC 0 ...10 V or DC 4...20 mA output signal from the pressure sensor.

Mechanical design

The pressure sensors are compact units and cannot be dismantled. No changes or adjustments are possible.

Accessories

FT-PZ1 The FT-PZ1 thread adapter kit is available for connection to gas or hydraulic systems with G½" threads. The kit comprises 1 stainless steel (1.4306) reducing coupling and 2 copper sealing washers.

Note !

Not usable with refrigerant medium (Ammonia)

Fitting notes

Mounting Instructions are enclosed with the sensor. The FT-PZ1 thread adapter (reducing coupling and copper sealing washer) should be used for connections to systems with G½" threads (refer to "Accessories"). To ensure tight fitting without leakage, copper sealing washers should be fitted to the flange seat.

To provide for test measurements without leakage of the medium, it is strongly recommended that an appropriate test adapter and shutoff device should be fitted. The pin on the inside of the screwed fitting of the sensor is designed to ensure that any Schrader-type fitting will be opened (or closed) when the sensor is installed or removed.

Pressure measurement with liquids

The tapping point should be at the side, near the bottom of the pipe. Do not measure the pressure from the top of the pipe (where it may be affected by airlocks) or the bottom (where it may be affected by dirt).

Always evacuate the system.

1907Z02

Pressure measurement with condensing gases

The tapping point should be at the top so that no condensate reaches the sensor.

1907Z03

Technical data

Electrical interface QBE2001... / QBE2101...	Power supply	with extra-low voltage only (SELV, PELV)
	Operating voltage (QBE2001...)	AC 24 V ±15 %, 50...60 Hz or DC 16...33 V
	Current consumption	<5 mA
	Operating voltage (QBE2101...)	DC 8...33 V
	Current consumption	20 mA
	Output signal QBE2001...	DC 0 ...10 V, R _{Load} > 10 kΩ (not galvanically separated, 3-wire connection, short-circuit proof and protected against polarity reversal)
	Output signal QBE2101...	DC 4...20 mA , R _{Load} ≤ $\frac{\text{Operating voltage} - 8 \text{ V}}{0.02 \text{ A}}$ Ohm (not galvanically separated, 2-wire connection, short-circuit proof and protected against polarity reversal)
	Accuracy:	(FS = Full Scale)
	Total of linearity, hysteresis and reproducibility	<±0.5 % FS
	Zero point, Full scale	<±0.5 % FS
Functional data	Long term stability	±1 % FS to DIN EN 60 770
	Temperature drift:	
	TC zero point	<±0.03 % FS/K
	TC sensitivity	<±0.015 % FS/K
	Response time	<2 ms (1 ms typically)
	Nominal pressure	relative pressure as in "Type summary" (measurement of difference from ambient pressure)
	Max. admissible pressure	3 x scale end value of measuring range (FS)
	Rupture pressure	6 x scale end value of measuring range (FS)
	Media	for use with all media, included ammonia, see also paragraph "Accessories". –40...+150 °C
	Admissible temperature of medium	
Protection	Maintenance	maintenance-free
	Mounting position	optional
	Protection standard	IP 67 to EN 60 529
Connections	Protection class	III to EN 60 730
	Connecting cable	PVC-cable, length 1.5 m, 3 x 0.5 mm ²
	QBE2001	PVC-cable, length 1.5 m, 2 x 0.5 mm ²
Environmental conditions	QBE2101	
	Screwed fitting	internal thread 7/16-20 UNF
	Operation to	IEC 60 721-3-3
	Climatic conditions	class 3K7
	Temperature	–40...+85 °C
	Humidity	insensitive to condensation
Directives and Standards	Storage/transport	IEC 60 721-3-2
	Climatic conditions	class 2K4
	Temperature	–40...+85 °C
	Humidity	insensitive to condensation
	Electromagnetic compatibility	
	Immunity to	EN 61 000-6-2, EN 61 326-1
CE	Emissions to	EN 61 000-6-3, EN 61 326-1
	conformity to EMC directive	2004/108/EC
	C-Tick conformity (EMC)	EN 61 000-6-3
Mechanical robustness	Mechanical robustness
