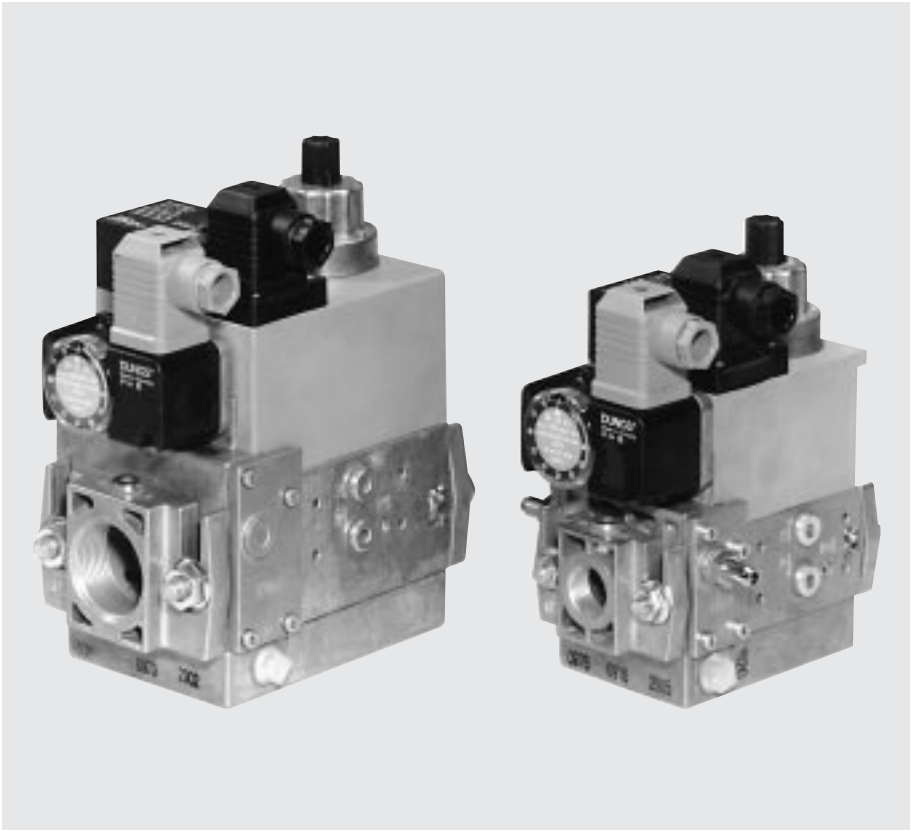
GasMultiBloc
Combined regulator and safety shut-off valves
Single-stage function

MB-D(LE) 405 - 412 B01

DUNGS®

7.21



Technical description
The DUNGS GasMultiBloc integrates filter, regulator, valves and pressure switches in one compact fitting. Various designs are possible by the modular system:
- Dirt trap: microfilter
- One regulator and two valves: B01
- Two valves are fast opening
- One valve is fast opening and one valve is slow opening
- Solenoid valves up to 360 mbar as per DIN EN 161 Class A Group 2
- Sensitive setting of output pressure by proportional regulator as per DIN EN 88 Class A Group 2
- High flow rates with low pressure drop
- DC solenoid drive interference degree N
- Main volume restrictor at valve V2
- Hydraulic opening delay
- Flange connections with pipe threads as per ISO 7/1
- Simple mounting, compact, light-weight

The modular system permits individual solutions by using external ignition gas tap in connection with separately controlled valves, by adding a valve proving system, mini/maxi pressure switches, pressure limiters, limit switch V2.

Application
The modular system permits individual solutions in gas safety and regulator engineering. Suitable for gases of families 1, 2, 3 and other neutral gaseous media.

Approvals
EC type test approval as per EC Gas Appliance Directive:

MB...405-412 B01 CE-0085 AP 3156

C type test approval as per EC Pressure Equipment Directive:

MB...405-412 B01 CE0036

Approvals in other important gas consuming countries.

Printed in Germany • Rösler Druck • Edition 06.04 • Nr. 214 762

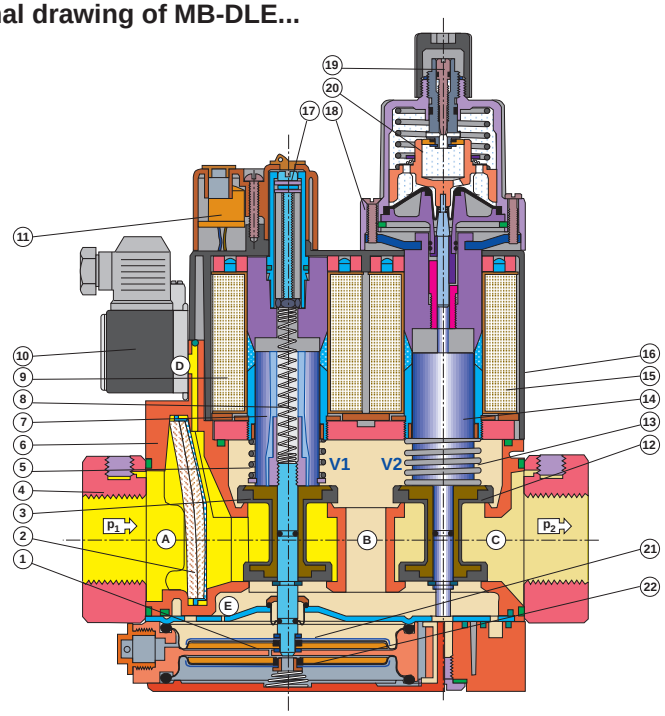
Functional description of gas flow
When the valves V1 and V2 are closed, chamber A is under inlet pressure.
A hole D in the filter housing connects min. pressure switch with chamber A.
If the inlet pressure applied to the pressure switch exceeds the incoming reference value, it switches through to the automatic burner control.
After release by the automatic burner control, valves V1 and V2 open. The gas flow through chambers A, B and C of the GasMultiBloc.

Operating method of valve-regulator combination on valve V1
A regulator, compensating for residual pressure is integrated in valve V1 (pressure regulating part). Armature 7 is not connected to valve plate unit 3. When it opens, armature 8 pretensions compression spring (V1) 5 and releases the valve plate unit.
When the valve closes, the armature acts directly on the valve plate unit.
The output pressure upstream of valve V2 is defined by pretensioning regulator spring 8 (tension spring) via setting screw 17.
The output pressure acts via opening E on the working diaphragm 21 of the regulator part. In regulated state, setting spring inlet pressure and pressure of working diaphragm are in force equilibrium.
The compensating diaphragm ensures the fast closing function of valve V1 and a high regulating quality.

Operating method of valve V2
Armature 14 of valve V2 is connected to valve plate unit 12. When it opens, armature 14 pretensions compression spring 13. The max. valve opening can be set by limiting the armature stroke by means of the main volume restrictor 18.
Min. opening (residual stroke) of valve (0.5 to 1.0 mm)
Main volume restrictor 18 is set by rotating the adjusting plate or the hydraulic brake. The fast and/or slow opening characteristic is influenced by setting fast stroke 19 at the hydraulic brake under the cover.

Closing function
When the supply voltage to the solenoid coils of valves V1 and V2 is interrupted, they are closed within < 1 s by the compression springs.

Sectional drawing of MB-DLE...



1	Pressure regulator	9	Solenoid V1		Setting:
2	Microfilter	10	Gas pressure switch	17	- Gas pressure p_a

Specifications

Nominal diameters Flange with pipe threads as per ISO 7/1 (DIN 2999)	MB-…405/407 B01 Rp 1/2, 3/4 and their combinations	MB-…410/412 B01 Rp 3/4, 1, 1 1/4 and their combinations
Max. operating pressure	**360 mbar (36 kPa)**	
Output pressure ranges	**MB-… S20/S22 p_a: 4 mbar to 20 mbar** **MB-… S50/S52 p_a: 4 mbar to 50 mbar**	
Pressure stage	PN 1	
Media	Gases of families 1, 2, 3 and other neutral gaseous media	
Ambient temperature	-15°C to +70°C (Do not operate MB-D below 0°C in liquid gas systems. Only suitable for gaseous liquid gas, liquid hydrocarbons destroy sealing materials.)	
Dirt trap	Sieve with 0.8 mm mesh width, filter made of random laid nonwoven fabric, microfilter, two-layer, changing the filter is possible without removing the valve.	
Pressure switches	Types GW A5, GW A2, NB A2, ÜB A2 mountable as per DIN EN 1854. For further information, refer to Datasheet GW A2 No. 215 183 and Datasheet GW A5 No. 225 901.	
Pressure regulator	Pressure regulator compensated for residual pressure, leakproof seal when switched off by means of valve V1 as per DIN EN 88 Class A. Setpoint spring permanently installed (no spring exchange possible). A vent line above roof is not required. Internal pulse tap provided.	
Solenoid valve V1	Valve as per DIN EN 161 Class A Group 2, fast closing, fast opening	
Solenoid valve V2	Valve as per DIN EN 161 Class A Group 2	

	Valve V2 design		Main volume restrictor
MB	fast closing	fast opening	without
MB-D	fast closing	fast opening	with
MB-DLE	fast closing	slow opening	with
MB-LE	fast closing	slow opening	without

Measuring/ignition gas connection	For G 1/8 as per DIN ISO 228, refer to Pressure taps on page 2	
Burner pressure monitor p_{Br}	Connection downstream of valve V2, pressure switch A2 mountable on adapter laterally	
Voltage / frequency	50-60 Hz 220-230 V AC - 15% + 10% Other preferred voltages: 240 VAC, 110-120 VAC, 48 VDC, 24-28 VDC	
Electrical connection	Plug connection as per DIN EN 175301-803 for valves and pressure switches	
Rating/power consumption Switch-on duration Degree of protection Radio interference	Refer to Dimensions on page 5 100% IP 54 as per IEC 529 (EN 60529) Interference degree N	
Materials of gas-conveying parts	Housing Diaphragms, seals Solenoid drive	aluminium die casting NBR basis, Silopren (silicone rubber) steel, brass, aluminium
Installation position	Solenoid vertically upright or lying horizontally as well as its intermediate positions	
Closed position signal contact	Closed position signal contact, type K01/1 (DIN-tested), mountable on V2
